Hampton Inn Brickell Miami

The still under construction Hampton Inn – Brickell will soon open to a happy group of green supporters. The hotel has adopted a sustainability initiative to be incorporated in all their business and operational plans.

The design of the hotel is conducive to natural light shining in to reduce electric lighting, and it is built east to west so the direct sunlight is minimized. Their water conservation initiative consists of everything dealing with water having an environmental device attached to it. The need for new linens and towels will be decided by the guest and not changed every day. An energy management system is installed in every room, and every appliance and TV is energy star rated. They have introduced a waste management program by instituting a recycling program. For better air quality, the whole building is declared smoke free, and employees have incentive programs to take city transit to work.

221 Rooms & Suites ranging from \$100-\$150 per night.

****Opening Fall 2011. More info soon****

50 SW 12th St.
Miami, FL 33130
