

# Green Stay

Guests coming into town? Put them up in luxurious green style at the new Hampton Inn & Suites Miami Brickell-Downtown, the city's first LEED-certified hotel. The facility features environmentally-friendly initiatives such as charging stations for electric cars, rainwater harvesting, in-room energy management systems, ozone laundry, low-flow fixtures and more. Even the products used by cleaning staff are non-toxic and environmentally safe. And, of course, it still boasts all the luxurious features of a top-quality hotel;
